

Florida's Nursing Education Programs Continued to Expand in 2013, While Licensure Exams Passage Rates of New Programs Declined

at a glance

To address the nursing shortage in Florida, the 2009 Legislature modified how the Board of Nursing oversees nursing education programs. The intent of the modifications was to increase the number of nursing programs and qualified nurses in Florida. Since the legislation took effect in July 2009,

- the Board of Nursing has approved 231 new nursing education programs, which has increased the total number of programs by 139%;
- the number of nursing student seats has increased by 180%;
- enrollment in nursing programs has increased by 58%, with the greatest increase occurring in nursing bridge programs;
- the number of students graduating from nursing programs has increased by 30%;
- the licensure exam passage rates of the nursing programs created since 2009 that had graduates who took the licensure exam declined—approximately 73% had exam passage rates that were more than 10% below the national average for the 2013 calendar year;
- 73% of practical nursing program graduates that received their initial license in 2011 are employed in a nursing-related field; and
- 90% of associate and bachelor's degree in nursing program graduates that received their initial registered nurse license in 2011 are employed in a nursing-related field.

Also, when comparing the two most recent academic years (2011-12 and 2012-13), nursing program retention rates decreased by 2%.

Scope

The 2009 Legislature directed OPPAGA to conduct a series of five annual reviews of the Board of Nursing's administration of the program approval and accountability processes for nursing programs.¹ This is the fourth report that addresses how nursing programs' capacity, enrollment, and student outcomes have changed since the 2009 law took effect.² OPPAGA will issue one more report on the program approval process and outcomes in 2015.

Background

To ensure quality nursing practice, Ch. 464, *Florida Statutes*, establishes the Florida Board of Nursing and grants the board authority to adopt rules, discipline nurses who violate regulations, and approve and monitor nursing education programs.³ In 2009, the Legislature modified the

¹ Chapters [2009-168](#) and [2010-37](#), *Laws of Florida*.

² The prior OPPAGA reports are *Board of Nursing Addressed Statutory Changes; Nursing Program Capacity Expanded in 2009-10*, OPPAGA [Report No. 11-06](#), January 2011; *Florida's Nursing Education Programs Continued to Expand in 2011 with Significant Increases in Student Enrollment and Graduates*, OPPAGA [Report No. 12-04](#), January 2012; and *Florida's Nursing Education Programs Continued to Expand in 2012 with Increases in Program Capacity, Student Enrollment, and Graduates*, OPPAGA [Report 13-03](#), January 2013.

³ New programs submit an application, fees, and supporting documents to the board office, which then reviews the application for any errors or deficiencies. Upon the receipt of a complete application, board staff places the program's application on the Board of Nursing's agenda for approval. The board monitors approved nursing programs by reviewing their students' scores on the National Council of State Boards of Nursing's National Council Licensure Examination (NCLEX).

process for approving new nursing education programs by removing rulemaking authority from the Board of Nursing and specifying the nursing education program approval process in statute.⁴ Our 2010 report identified several issues with the board’s implementation of the 2009 law and made recommendations to the Legislature and the Board of Nursing.⁵ The 2010 Legislature modified statutes to address issues consistent with those raised in our report and by stakeholders.⁶ Our 2011 report determined that the board has implemented the revised processes and addressed other issues identified.⁷ Our 2012 and 2013 reports found that student enrollment and the number of graduates was increasing.⁸

As shown in Exhibit 1, 294 nursing education programs in Florida had students enrolled during the 2012-13 academic year.^{9,10} These

included 133 programs that offered a licensed practical nursing certificate, 128 programs that offered an associate degree in nursing, and 33 programs that offered a bachelor’s degree in nursing. Many of these programs offered both a generic curriculum (also called a track) for students with no medical experience and a bridge curriculum, which is an expedited program for students with nursing licenses or previous medical experience.¹¹

These nursing programs are offered by public school districts, Florida colleges, state universities, private institutions licensed by the Commission for Independent Education, and private institutions that are members of the Independent Colleges and Universities of Florida (ICUF). In addition, state law authorizes Pensacola Christian College to offer a bachelor of science in nursing degree.^{12,13}

⁷ *Board of Nursing Addressed Statutory Changes; Nursing Program Capacity Expanded in 2009-10*, OPPAGA [Report No. 11-06](#), January 2011.

⁸ *Florida’s Nursing Education Programs Continued to Expand in 2011 with Significant Increases in Student Enrollment and Graduates*, OPPAGA [Report No. 12-04](#), January 2012; and *Florida’s Nursing Education Programs Continued to Expand in 2012 with Increases in Program Capacity, Student Enrollment, and Graduates*, OPPAGA [Report 13-03](#), January 2013.

⁹ Two institutions in other states offer two of Florida’s nursing education programs. Indiana State University and Western

Governors University have distance learning nursing programs that award a bachelor of science in nursing degree. At Indiana State University students must have a practical nursing certificate to be admitted. These programs are not included in this total.

¹⁰ In addition, 52 programs were approved by the Board of Nursing but did not have students enrolled during the 2012-13 academic year.

¹¹ Section [464.019](#), *F.S.*, does not differentiate between bridge and generic curriculum tracks. In addition, the Florida Board of Nursing does not make a distinction between generic, bridge, or accelerated tracks.

¹² Section [1005.06 \(1\)\(e\)](#), *F.S.*

¹³ Nursing education programs in Florida that hold specialized nursing accreditation by the National League for Nursing Accrediting Commission (NLNAC) or by the Collegiate Commission on Nursing Education (CCNE) are not regulated by the Florida Board of Nursing.

Exhibit 1

During Academic Year 2012-13, 294 Nursing Education Programs in Florida Had Students Enrolled¹

¹ The total includes all curriculum tracks for programs, including 70 programs with multiple tracks.

² Five licensed practical nurse programs have both a generic and a bridge curriculum track and six have a bridge-only track.

³ Sixty-three associate degree programs have both a generic and a bridge curriculum track and 12 have a bridge-only track.

⁴ Two bachelor’s degree programs have both a generic curriculum track and a second degree curriculum track and 10 programs only have a second degree track. In addition, Indiana State University and Western Governors University are not included in these totals but have distance bachelor’s degree programs that admit Florida students.

Source: OPPAGA survey of nursing education programs and analysis.

Findings

How many new nursing programs did the board approve, and how is the board monitoring programs?

The 2009 law changed how nursing education programs are approved and monitored by the Board of Nursing. Since the law took effect, the number of new nursing programs has increased significantly. In addition, the 2009 law specified the criteria the board should follow for placing nursing programs on probationary status.

Overall, the number of new nursing programs has increased by 139% since the 2009 law went into effect. Of the 370 nursing programs statewide, 231 were approved since the statutory changes took effect in July 2009 (a 139%

increase).¹⁴ As shown in Exhibit 2, all but 10 of the programs that applied since the law took effect have been approved.¹⁵ During calendar year 2013, the board considered 60 and approved 59 applications for new nursing programs offered by private institutions licensed by the Commission for Independent Education.¹⁶

¹⁴ Nineteen programs closed in 2013 and 52 programs were approved by the Board of Nursing but did not have students enrolled during the 2012-13 academic year. Five programs did not respond to the survey and were not included in our analysis.

¹⁵ Prior to the law taking effect, 17 of 18 nursing program applications were approved from January 2008 through June 2009.

¹⁶ This is an unduplicated count of program applications and board approvals from January through December 2013. Programs may waive the committee's review of their application or their application may be denied. Also, the one program that was denied is in the application process to be reconsidered at the next board meeting.

Exhibit 2

Since the 2009 Law Went Into Effect, 231 of the 241 Nursing Programs That Applied Were Approved

Source: OPPAGA analysis of Florida Board of Nursing data.

As shown in Exhibit 3, 47% of the 59 new programs approved in 2013 award associate degrees and 31% award practical nursing certificates. The remaining programs (22%) award bachelor's degrees; this is an increase of 11 bachelor's degree programs since last year.

Exhibit 3
Almost Half of the Nursing Programs Approved in 2013 Offer Associate Degrees

Source: OPPAGA analysis of Florida Board of Nursing data.

In 2013, 24 (6%) of the 370 nursing programs in Florida were on probation. The 2009 law requires nursing programs to have a minimum average graduate licensure exam passage rate and to submit an annual report. If a program's average falls below 10% of the national average for two consecutive calendar years, it is placed on probation, must submit a corrective action plan, and must increase its average passage rate within two years.^{17, 18}

During 2013, the board placed 18 nursing programs on probation and 6 remained on probation from the prior year because their average graduate licensure exam passage rates were below the required rate for two consecutive years.¹⁹

How have nursing programs' capacity, enrollment, and student outcomes changed since the 2009 law took effect?

Legislative changes to nursing program accountability processes were intended to increase the number and quality of nursing graduates in Florida by expanding the capacity of existing programs and creating new programs.

The number of seats available in nursing education programs for qualified students continued to increase in academic year 2012-13, while other capacity measures declined. As shown in Exhibit 4, the number of seats available for qualified students increased from 16,420 to 45,942 from 2008-09 to 2012-13 for an overall increase of 180% since the law was enacted. This increase in available seats is the result of the approval of new programs and the expansion of existing programs. The revised law allows existing programs to increase capacity without board approval. In addition, the number of students admitted to nursing programs also increased by 60% from 2008-09 to 2012-13. However, when comparing 2011-12 and 2012-13, other capacity measures declined. For instance, there was a 9% decline in the number of student applications received, a 4% decline in the number of qualified applicants, and a 1% decline in the number of students approved for admission who actually enrolled in nursing programs.

¹⁷ Section 464.019, F.S., specifies that the first calendar year of scores the board could use was 2010. As a result, 2012 was the first year the board could place programs on probation using the criteria in law, based on calendar years 2010 and 2011.

¹⁸ Fifteen practical nursing and nine associate degree in nursing programs were on probation.

¹⁹ In 2012, there were 11 programs on probation; in 2013, 4 of these programs were closed, 1 increased its average passage rate and was removed from probation, and 6 remained on probation.

Exhibit 4**The Number of Seats Available in Nursing Programs Continued to Increase Under the New Law^{1,2}**

Capacity Measure	2008-09 ³	2009-10	2010-11	2011-12	2012-13	Percentage Change	
						2011-12 to 2012-13	2008-09 to 2012-13
Seats ⁴	16,420	20,021	24,284	29,477	45,942	56%	180%
Applications Received	47,104	70,556	65,816	70,542	63,866	-9%	36%
Qualified Applicants	30,760	41,391	40,410	42,806	41,158	-4%	34%
Students Admitted	17,339	19,815	22,920	26,848	27,689	3%	60%
Students Admitted Who Enrolled	15,691	18,414	21,296	24,171	24,017	-1%	53%

¹ Eighteen programs did not respond to the survey in 2013 but did respond in 2012. For these programs, we used the data reported for 2011-12. Five programs did not respond in 2013 and did not have data for the prior year; therefore, we did not include these programs in our analysis.

² This data does not include practical nursing (bridge curriculum) programs.

³ The 2008-09 data is prior to the law taking effect.

⁴ Nursing programs reported a large increase in the seats available in 2012-13 compared to prior years. This increase may be attributed to programs that were ramping up, expanding, or had underreported seats in prior years. We contacted programs with large changes in the number of seats reported to resolve potential inaccuracies.

Source: OPPAGA survey of nursing education programs.

Total student enrollment also continued to increase in 2012-13. As shown by Exhibit 5, overall student enrollment in nursing programs grew by 58% from 2008-09 to 2012-13. Enrollment increased in almost all types of curriculum during this four-year period, with the largest percentage increases in nursing bridge curriculum programs. In addition, the associate degree in nursing (generic curriculum) programs experienced a 73%

increase in enrollment due to the addition of 28 new programs and the expansion of existing programs. Enrollment in bachelor's in nursing (second degree) programs decreased 19%. However, when comparing the two most recent academic years (2011-12 and 2012-13), student enrollment in all types of nursing programs increased by 3.6% (from 35,831 to 37,127).

Exhibit 5**Student Enrollment Continued to Increase Across Most Types of Nursing Programs**

Curriculum Type	Enrollment ¹					Percentage Change	
	2008-09 ²	2009-10	2010-11	2011-12	2012-13	2011-12 to 2012-13	2008-09 to 2012-13
Practical Nursing (LPN) – Generic	6,534	7,705	9,021	9,555	8,239	-13.8%	26%
Practical Nursing (LPN) – Bridge	30	33	219	176	302	71.6%	907% ³

Bachelor's Degree in Nursing – Generic	4,081	4,342	4,854	5,600	5,835	4.2%	43%
Bachelor's Degree in Nursing – 2nd Degree	1,142	1,225	1,012	1,011	925	-8.5%	-19%
Total	23,547	26,193	32,288	35,831	37,127	3.6%	58%

¹ Eighteen programs did not respond to the survey in 2013 but did respond in 2012. For these programs, we used the data reported for 2011-12. Five programs did not respond in 2013 and did not have data for the prior year; therefore, we did not include these programs in our analysis.

² The 2008-09 data is prior to the law taking effect.

³ Since the law took effect, practical nursing (bridge curriculum) programs have grown from two programs in 2008-09 with enrollment to nine programs with enrollment in 2012-13, which accounts for the large percentage increase in graduates from 2008-09 to 2012-13.

Source: OPPAGA survey of nursing education programs.

The total percentage of students retained in nursing programs has decreased slightly. Retention rates measure whether students persist in or complete their educational program a year later. We assessed retention in each type of nursing program using the cohort of students who entered the programs from 2008 to 2012. To calculate retention, we added the number of graduates and the number of students still enrolled and divided by the number of newly enrolled students for each cohort.²⁰

²⁰ Nursing programs admit students throughout the year, with several programs admitting students multiple times per year. We requested each nursing program to select a cohort of students for 2008 through 2012 and report to us the outcomes of these students over a one-year period.

The resulting retention rates varied slightly among program types and curriculum tracks, with an overall decrease from 2011-12 to 2012-13 of two percentage points (from 86% to 84%). As shown in Exhibit 6, the one-year retention rates decreased for most curriculum types, with the largest percentage point decrease in associate degree bridge curriculum programs from 89% to 84%. Two curriculum tracks had improved retention rates. The practical nursing programs retention rate increased from 79% to 81%, and the retention rate for bachelor’s degree in nursing second degree programs increased from 93% to 95%. Appendix A, Exhibit A-1 provides additional details on the retention rates for nursing programs.

Exhibit 6
The Total Percentage of Students Retained in Nursing Programs Decreased Slightly in 2013^{1,2}

¹ Eighteen programs did not respond to the survey in 2013 but did respond in 2012. For these programs, we used the data reported for 2011-12. Five programs did not respond in 2013 and did not have data for the prior year; therefore, we did not include these programs in our analysis.

² This data includes graduates and students enrolled and does not include the practical nursing (bridge curriculum) programs.

Source: OPPAGA survey of nursing education programs.

Overall, the number of students graduating from nursing programs continued to increase in 2012-13. Lengths of time for completing nursing programs generally range from one to four years, depending on curriculum. For example, a licensed practical nursing program is a one-year program, while the associate degree in nursing is a two-year program, and the bachelor’s degree in nursing is a four-year program. As a result, students who enrolled in new programs or programs that experienced increased capacity as a result of the new law began to graduate during the 2010-11 academic year. As shown in Exhibit 7, overall, the number of students graduating from nursing programs increased by 30% from 2008-09 to 2012-13. However, when comparing the two most recent academic years (2011-12 and 2012-13), the

percentage increase of nursing graduates in all types of nursing programs was only 1.4% (from 14,923 to 15,128).²¹ The percentage change in graduates varied among the types of programs. The bridge curriculum programs experienced the largest increases, 74.3% in the number of practical nursing bridge graduates and 17.1% in the number of associate degree bridge curriculum graduates. In contrast, the number of practical nursing generic curriculum graduates decreased by 18.6% from 2011-12 to 2012-13. Graduates from bachelor’s degree in nursing programs also declined slightly during this time period.

²¹ Other factors may affect the graduation rate of students. Factors for which OPPAGA could not control include students’ economic stability, cost of programs, and curriculum changes.

Exhibit 7

The Overall Number of Students Graduating from Nursing Programs Continued to Increase Slightly in 2012-13

Curriculum Type	Graduates ¹					Percentage Change	
	2008-09 ²	2009-10	2010-11	2011-12	2012-13	2011-12 to 2012-13	2008-09 to 2012-13
Practical Nursing (LPN) – Generic	3,944	3,801	4,591	5,035	4,101	-18.6%	4%
Practical Nursing (LPN) – Bridge	23	19	93	101	176	74.3%	665% ³

Associate Degree in Nursing – Bridge	873	1,014	1,330	1,787	2,092	17.1%	140%
Bachelor's Degree in Nursing – Generic	1,623	1,757	1,750	2,008	1,900	-5.4%	17%
Bachelor's Degree in Nursing – 2nd Degree	407	432	508	515	508	-1.4%	25%
Total	11,644	11,708	13,192	14,923	15,128	1.4%	30%

¹ Eighteen programs did not respond to the survey in 2013 but did respond in 2012. For these programs, we used the data reported for 2011-12. Five programs did not respond in 2013 and did not have data for the prior year; therefore, we did not include these programs in our analysis.

² The 2008-09 data is prior to the law taking effect.

³ Since the law took effect, practical nursing (bridge curriculum) programs have grown from two programs in 2008-09 with enrollment to nine programs with enrollment in 2012-13, which accounts for the large percentage increase in graduates from 2008-09 to 2012-13.

Source: OPPAGA survey of nursing education programs.

The licensure exam passage rates of the nursing programs created since 2009 that had graduates who took the licensure exam declined—approximately 73% had exam passage rates that were more than 10% below the national average for the 2013 calendar year. Since the statutory changes took effect in July 2009, 112 of the 231 newly-approved programs had graduates who took the National Council of State Boards of Nursing Licensure Examination (NCLEX) in calendar year 2013. Approximately 73% of these programs (82 of the 112) had exam passage rates that were more than 10% below the national average.²² During 2013, 24 of the 82 programs were on probation; if the remaining programs continue to have licensure passage rates 10% below the national average for another consecutive calendar year, Florida law requires the Board of Nursing to place these programs on probation.²³ Of the remaining 30 programs that had graduates who took the licensure exam, 10 had passage rates that were slightly below the national average, while the remaining 20

programs met or exceeded the national average for the 2013 calendar year.^{24, 25}

The overall licensure exam passage rate in Florida for associate degree in nursing programs was 74%, for licensed practical nursing programs was 75%, and for bachelor’s degree in nursing programs was 88%; these rates were a decline from 2012. In addition, the overall number of students who passed the exam decreased compared to 2012. Appendix B lists the passage rates for each nursing program in Florida.

Most practical nursing program graduates (73%) that received their initial license in 2011 were likely employed in a nursing-related field. As the curriculum length for practical nursing programs is typically one year, data was available to determine if practical nursing students who graduated since the passage of the 2009 law were

²⁴ The national average exam passage rates for each program type vary from 85.18% for a bachelor’s degree program, 81.43% for an associate degree program, and 84.63% for a practical nursing program.

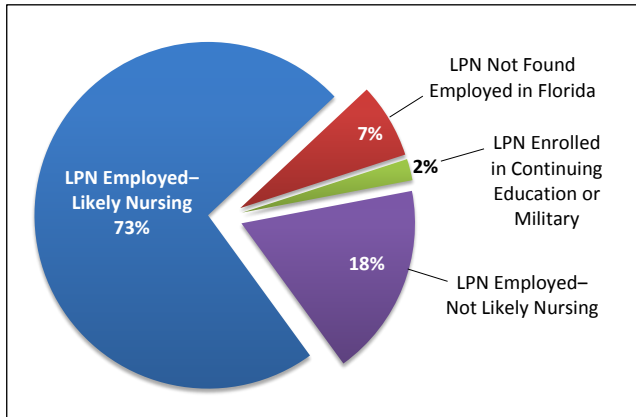

²⁵ In calendar year 2012, 158 new bachelor’s degrees in nursing program graduates took the NCLEX exam, while 2,555 new associate degree in nursing program graduates and 753 new practical nursing program graduates took the exam.

²² All of these programs were private institutions licensed by the Commission for Independent Education.

²³ These guidelines do not apply to programs that are accredited by a specialized nursing accrediting agency in accordance with s. [464.003\(1\)](#), F.S.

likely employed in a nursing-related field.²⁶ As of 2012, 73% of the practical nursing program graduates that received their initial license in 2011 were likely employed in a nursing-related field.²⁷ (See Exhibit 8.)

**Exhibit 8
Most Graduates of Practical Nursing (LPN) Programs Who Received Their Initial Nursing Licenses in 2011 Were Likely Employed in Nursing-Related Fields¹**

¹ The FETPIP data used in this analysis shows whether nurses were employed in a nursing-related industry, but it did not indicate that they were employed as nurses.

Source: OPPAGA analysis of licensure data from the Department of Health and unemployment insurance data from the Florida Education and Training Placement Information Program (FETPIP).

Most nursing program graduates (90%) that received their initial registered nurse license in 2011 were likely employed in a nursing-related field. Registered nurses (RNs) may be graduates of associate degree and bachelor’s degree nursing

²⁶ This analysis is based on licensure data from the Department of Health and unemployment insurance data from the Florida Education and Training Placement Information Program (FETPIP). This data includes any nurses who received their licenses by passing the licensure exam in 2011 and may include students who graduated in prior years. The FETPIP data shows whether nurses are employed in a nursing-related industry but it does not indicate that they are employed as nurses. Nursing-related industries include hospitals, doctors’ offices, assisted living facilities, nursing homes, and other patient care facilities. Nursing-related industries may also include educational programs that teach health care or health care insurance industries.

²⁷ This is consistent with the previous findings: in 2011, 72% of the practical nursing program graduates that received their initial license in 2010 were employed in a nursing-related field, while 21% of these graduates were not employed in a nursing-related field.

programs.²⁸ As of 2012, 90% of the associate or bachelor’s nursing program graduates that received their initial RN license in 2011 were likely employed in a nursing-related field. (See Exhibit 9.) Appendix C shows the percentages of Florida nursing program graduates (practical, associate degree, and bachelor’s degree) who received their licenses in 2007 through 2011 and were likely employed in a nursing-related field as of 2012.

**Exhibit 9
Most Graduates of Nursing Programs Who Received Their Initial Registered Nursing (RN) Licenses in 2011 Were Likely Employed in Nursing-Related Fields^{1 2}**

¹ The FETPIP data used in this analysis shows whether nurses were employed in a nursing-related industry, but it did not indicate that they were employed as nurses.

² Percentages do not add exactly to 100% due to rounding.

Source: OPPAGA analysis of licensure data from the Department of Health and unemployment insurance data from the Florida Education and Training Placement Information Program (FETPIP).

²⁸ This analysis is based on licensure data from the Department of Health and unemployment insurance data from the Florida Education and Training Placement Information Program (FETPIP). This data includes any nurses who received their licenses by passing the licensure exam in 2011 and may include students who graduated in prior years. The FETPIP data shows whether nurses are employed in a nursing-related industry, but it does not indicate that they are employed as nurses. Nursing-related industries include hospitals, doctors’ offices, assisted living facilities, nursing homes, and other patient care facilities. Nursing-related industries may also include educational programs that teach health care or health care insurance industries.

Appendix A

Retention of Florida Nursing Education Programs

Nursing Program Student Retention

Exhibit A-1 shows the number of new students enrolled in each type of nursing program who entered the programs in 2010, 2011, and 2012 and the percentage of students retained (i.e., still enrolled in the programs). Retention rates provide information on whether students persist in or complete their educational program a year later. We assessed retention in each type of nursing program using the cohort of students who entered the programs in 2010, 2011, and 2012. To calculate retention for each cohort, we added the number of graduates and the number of students still enrolled and divided by the number of newly enrolled students. Overall, the retention rate for students who entered in 2012 was slightly lower than the rates for those who entered in 2011.

Exhibit A-1

The Percentage of Students Retained in Nursing Programs Decreased in 2013¹

Curriculum Type	Students Entering in 2010 (Status as of 2011)		Students Entering in 2011 (Status as of 2012)		Students Entering in 2012 ² (Status as of 2013)	
	Total New Students Enrolled	Percentage Retained	Total New Students Enrolled	Percentage Retained	Total New Students Enrolled	Percentage Retained
Practical Nursing (LPN) – Generic	2,947	79%	2,494	79%	2,954	81%
Associate's Degree in Nursing – Generic	4,605	85%	4,472	85%	6,305	81%
Associate's Degree in Nursing – Bridge	1,173	83%	1,440	89%	2,299	84%
Bachelor's Degree in Nursing – Generic	1,478	92%	2,023	94%	1,665	93%
Bachelor's Degree in Nursing – 2nd Degree	538	87%	459	93%	576	95%
Total	10,741	84%	10,888	86%	13,799	84%

¹ Nursing programs admit students throughout the year, with several programs admitting students multiple times per year. We requested each nursing program to select a cohort of students for 2010, 2011, and 2012 and report to us the outcomes of these students over a one-year period.

² Eighteen programs did not respond to the survey in 2013 but did respond in 2012. For these programs, we used the data reported for 2011-12. For these programs, we used the data reported for 2011-12. Five programs did not respond in 2013 and did not have data for the prior year; therefore, we did not include these programs in our analysis.

Appendix B

Licensed Practical Nurse Program Graduate Exam Scores

Exhibit B-1 shows for each institution the passage rates for licensed practical nurse program graduates who took the National Council of State Boards of Nursing’s National Council Licensure Examination (NCLEX) during calendar years 2011 through 2013.^{1,2} The percentage of exam takers who passed the exam continued to decline from 2012 to 2013 (77% to 75%). Programs approved since the 2009 law are highlighted in yellow.

Associate Degree in Nursing (Generic and Bridge) Program Graduate Exam Scores

Exhibit B-2 shows for each institution the passage rates for associate degree in nursing program graduates who took the National Council of State Boards of Nursing’s National Council Licensure Examination (NCLEX) during calendar years 2011 through 2013.³ This includes both associate degree in nursing (generic curriculum) program students as well as associate degree in nursing (bridge curriculum) program students. While the percentage of exam takers who passed declined from 2012 to 2013 (83% to 74%), the overall number of students passing the exam increased (6,182 to 6,407). Programs approved since the 2009 law are highlighted in yellow.

Bachelor of Science in Nursing (Generic and Second Degree) Program Graduate Exam Scores

Exhibit B-3 shows for each institution the passage rates for bachelor of science in nursing program graduates who took the National Council of State Boards of Nursing's National Council Licensure Examination (NCLEX) in calendar years 2011 through 2013.⁴ This includes both bachelor of science in nursing (generic program) students and bachelor of science in nursing second degree students. The percentage of exam takers who passed decreased from 2012 to 2013 (94% to 88%) as did the number of students passing the exam (2,300 to 2,246).

Appendix C

Employment Outcomes of Florida Nursing Education Program Graduates

Exhibit C-1 shows the percentages of Florida nursing program graduates who received their licenses in 2007 through 2011 and were employed in a nursing-related field as of 2012. The data showed that most individuals who graduated from a Florida nursing program and received a license to practice nursing were employed in nursing-related fields in Florida.⁵ For example, 92% of 2007 licensees, 91% of 2008 licensees, 91% of 2009 licensees, 89% of 2010 licensees, and 84% of 2011 licenses were employed in a health care-related field in Florida.⁶ To determine how many graduates were likely employed in nursing fields in Florida, we obtained data on individuals who were approved for a nursing license (practical nursing or professional nursing) in 2007, 2008, 2009, 2010, and 2011 and selected those individuals who reported graduating from a Florida nursing school. We matched these individuals to the Florida Education and Training Placement Information Program (FETPIP) unemployment insurance database to determine if they were employed in Florida and where they were employed.

Exhibit C-1

Most Graduates of Florida Nursing Programs Who Received a Nursing License from 2007 through 2011 Were Likely Employed in Nursing-Related Fields in 2012¹

¹ Percentages do not add exactly to 100% due to rounding.

Source: OPPAGA analysis of licensure data from the Department of Health and unemployment insurance data from the Florida Education and Training Placement Information Program (FETPIP).

⁵ The 2007, 2008, 2009, 2010, 2011, and 2012 calendar years were the most recent years available for this analysis, as the unemployment insurance database runs a year behind.

⁶ In 2011, all of the licensees identified as “enrolled in continuing education or in the military” were enrolled in continuing education.

The Florida Legislature

Office of Program Policy Analysis and Government Accountability

OPPAGA provides performance and accountability information about Florida government in several ways.

- [Reports](#) deliver program evaluation and policy analysis to assist the Legislature in overseeing government operations, developing policy choices, and making Florida government more efficient and effective.
- [PolicyCasts](#), short narrated slide presentations, provide bottom-line briefings of findings and recommendations for select reports.
- Government Program Summaries (GPS), an online encyclopedia, www.oppaga.state.fl.us/government, provides descriptive, evaluative, and performance information on more than 200 Florida state government programs.
- [PolicyNotes](#), an electronic newsletter, delivers brief announcements of research reports, conferences, and other resources of interest for Florida's policy research and program evaluation community.
- Visit OPPAGA's website at www.oppaga.state.fl.us

OPPAGA supports the Florida Legislature by providing data, evaluative research, and objective analyses that assist legislative budget and policy deliberations. This project was conducted in accordance with applicable evaluation standards. Copies of this report in print or alternate accessible format may be obtained by telephone (850/488-0021), by FAX (850/487-3804), in person, or by mail (OPPAGA Report Production, Claude Pepper Building, Room 312, 111 W. Madison St., Tallahassee, FL 32399-1475). Cover photo by Mark Foley.
